## **Wolmanit® CX-8; Confirmation for field testing acc. EN 252:2014**

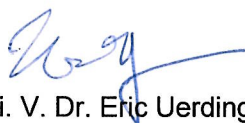

Dear Sirs,

there are numbers of harmonized European standard (hEN) for structural timber wherein the durability of the timber can be improved by the treatment with wood preservatives.

The wood preservatives used for the timber treatment have to fulfil the requirements of EN 599-1:2009-10 "Efficacy of preventive wood preservatives.." in the intended use classes. In addition EN 14229:2010 "Structural timber-Wood poles for overhead lines" requires that the wood preservative has been tested acc. to EN 252.

**We herewith confirm that Wolmanit® CX-8 fulfils the requirements of EN 599-1:2009-10 for use class 1, 2, 3 and 4 including in ground field testing acc. to EN 252:2014.**

Kind regards,  
BASF Wolman GmbH

i. V. Dr. Eric Uerdingen

i. A. Rainer Wisberger
